Summary — i am a passionate app developer with years of experience creating Android, iOS (SwiftUI), and Flutter apps. I enjoy building cloud-powered mobile platforms, integrating REST APIs and Firebase, and working with Agile teams to deliver apps that people love to use.”

Skills

Mobile Android (Java/Kotlin, Jetpack), Flutter (Riverpod, Animations), iOS (Swift basics), Kotlin Multiplatform (KMM)	Cloud basics
Backend Node.js, Python REST APIs, GraphQL	Testing Manual and Automated (JUnit, Mockito, XCTest)
Cloud Firebase (Firestore, Cloud Messaging), Google	Tools Git, Android Studio, Xcode, VSCode, Postman, Figma
	Deployment Play Store (App Bundles, Rollouts)

Experience

Self-Employed

2019 – 2024

Mobile App Developer

- Designed, developed, and published 6 Android apps on Play Store (Skykrew), including VPN, streaming, smart home automation, and utility tools.
- Managed full app lifecycle: requirements gathering, wireframing, coding, testing, and deployment.
- Applied advanced Android techniques such as MVVM architecture, dependency injection (Hilt), offline caching (Room), and background processing (WorkManager).
- Developed cross-platform apps using Flutter/Dart and experimented with Kotlin Multiplatform (KMM) for shared business logic.
- Integrated REST APIs, Firebase services (Auth, Firestore, Cloud Messaging), and monetization with multiple ad SDKs.
- Implemented user-centric UI/UX following Material Design principles and responsive layouts for various devices.
- Conducted automated testing with JUnit and Mockito; maintained code quality using linting and static analysis.
- Managed Google Play Store deployments, including rollout strategies, crash analytics, and version control.

Saylani Welfare International Trust, Faisalabad

Oct 2022 – Mar 2023

Android Development Intern

- Collaborated with a team of 5 developing Android apps using Agile practices and modular code.
- Developed UI screens from Figma designs; implemented RecyclerViews, navigation, and ensured responsive layouts.
- Integrated ad networks such as AdMob and Facebook Audience Network for app monetization.
- Assisted with API integration and backend testing using Postman.
- Used Logcat for runtime debugging and wrote basic JUnit tests to ensure app stability.
- Learned Play Store deployment and app release best practices.
- Explored iOS basics by creating simple Swift apps to understand cross-platform development concepts.

Education

Eötvös Loránd University (ELTE), Budapest

B.Sc. in Computer Science

Expected Graduation: 2027

2024 – Present

Current CGPA: 4.2

GC University (GCUF), Faisalabad, Pakistan

B.Sc. in Software Engineering

2022 – 2024

Completed 4 Semesters

Projects

Skykrew Play Store

6 Live Apps

- **U-VPN Master VPN:** Secure VPN app with one-click connectivity
- **Rotten Tomatoes:** Movie TV streaming app with REST APIs, watchlists, and genre filtering.
- **Universal Remote:** Smart home app supporting IR/WiFi devices, macros, and voice control.
- **You Cin3 Filmes e Series:** Video library app with offline support and Glide image caching.
- **MusiX - Play All Music:** Lightweight background music player with media session APIs.
- **Open Wallpaper:** Wallpaper browser and downloader app with local caching.

Certifications

- Google Android Nanodegree
- CS50 by Harvard
- Swift Programming (freecodecamp)
- UNICEF Volunteer Training
- Aspire Leadership Program (HarvardX)

Languages

- English (Advanced), Urdu/Pashto/Hindi (Native), Hungarian (A2)

Hobbies

- Travelling, Reading Books, Watching Documentaries, Sports
